

Lights, Camera, Action!

Saving energy and protecting the environment is important to all of us. And you can do your part — every day. Now, here's your chance to show how you go above and beyond to conserve energy — **and win a cash prize!**

So take out your video cameras and highlight your energy-saving efforts or inspire us with new ideas. Creativity counts — so use your imagination!

The contest is open to high school students (13 years and older), including those who are home-schooled, within NJNG's service territory. Here's what you need to know:

- Both individual and group video projects are accepted. NJNG will award the individual video winner **\$500** and the group video winner will receive **\$2,500 for its club or class**. Plus the schools of the winning students will each receive from NJNG a **\$1,000 contribution** toward an energy conservation or environmental project.
- Our community partner, the Asbury Park Press, will display the finalists' videos on *app.com*, where the public will vote for an additional viewer's choice award of **\$500** from NJNG.
- Videos should be no more than two minutes in length and **highlight natural gas energy conservation efforts or ideas**.
- Visit the **Save Energy & Money section of njng.com** for resource material for your video. **Natural gas conservation efforts should be the primary focus of the video (such as heating, water heating and cooking).**
- Your school has the complete contest rules and contact information to get you started. Good luck!

It's a great project for an environmental, science or communications club and remember — the winning group prize is \$2,500 for your class or club!
